

MaRCTex Inc.

Manufacturers' Representative for the Electronics Industry Covering: TX, OK, AR, LA

Represented Equipment and Supplies

3D SPI, 3D AOI, 3D AXI
Easy programming and defect review
AI driven software for the fastest and easiest programming in the industry.

X-ray Counters with advanced AI technology for automatic part recognition.
X-ray Systems for cost effective inspection
Rework Systems- Largest installed base in the world

Vapor-Phase Reflow
Condensio series can solder even the most difficult assemblies quickly and dependably, at temperatures up to 240 Deg C.
Optional vacuum module ensures void-free joints-directly after the soldering process or as a pre-vacuum. All parameters are completely adjustable, unlike others on the market.

Flying Probe and ICT Testers
Spea is the world leader in Flying Probe and ICT tester technology.
Multiple platforms to choose from. USA Headquarters located in Tyler, Texas.

PCB Fabrication
One-Stop-Shop for your Bare Board needs
1-7 day quick-turn, 3-4 week standard
Rigid, Flex, Rigid-Flex, Aluminum
Partnered factories in: USA, Taiwan, China
Materials: ENIG, EPIG, ENEPIG, OSP, Immersion tin, Carbon Ink, HASL, Lead-Free HASL, Immersion Silver, Hard Gold
ISO9001:2015, ISO14001, TS16949, AS9100, ISO13485, UL
EXCELLENT SERVICE AND ON-TIME DELIVERY

MaRC TeX Inc.

Manufacturers' Representative for the Electronics Industry Covering: TX, OK, AR, LA

Distribution Products through MaRC Technologies

BenchPro™ produces and distributes the finest workbenches available today. They stock nothing, yet produce workbenches and chairs in hundreds of colors and sizes in three to five days.

BIOFIT Ergonomic Seating

for the Production Floor, Plant, Refinery and Mill. The Industrial BioFit line provides products that are perfect for improving productivity, safety, and stability in various industrial workspaces.

Soldering and Desoldering system. The most powerful systems on the market today for both simple and complex hand soldering applications and rework.

Curie Heat Technology which responds to the thermal demands of each solder joint by adjusting the power instantaneously, thereby meeting the exact requirements of the substrate component and solder material.

World Leaders in ergonomic microscopy, digital 3D visualization and metrology solutions

Digital 3D inspection systems and metrology systems enable our customers globally to improve quality, efficiency and productivity.

Closed-Loop Water washers for PCBA's, Stencils, Pallets, and more. **Partnered with Kyzen and Zestron for Chemistry** PBT Works offers cleaners unmatched in the Electronics Manufacturing Industry for "Direct-Spray-in-Air" batch washers.
